OFFICIAL EMAIL THREAT, GEOLOCATION & INVESTIGATIVE FORENSIC REPORT

Case / Evidence ID:	PG-2026-DEMO-001
Timestamp (UTC):	2026-09-04 12:00:00 UTC
Evidence SHA-256:	e3b0c44298fc1c149afb4c8996fb92427ae41e4649b934ca495991b7852b855
Evidence MD5:	N/A
File Size:	1024 bytes
Subject:	URGENT: Verify Payment Details
Sender (From):	accounting@paypa1-support.com

Overall Fraud Risk Score:	88 / 100	Threat Classification:	Business Email Compromise (BEC)
Attribution Profile:	Anonymized / Proxy Attack Infrastructure	Urgency / Coercion:	High / Coercive

1. Technical Protocol & Header Authentication Audit

Mechanism	Status	Diagnostic Finding
SPF (Sender Policy Framework)	FAIL	Sending IP authorization against sender domain DNS policy
DKIM (DomainKeys Identified Mail)	FAIL	Cryptographic signature validation of message contents
DMARC Alignment	FAIL	Domain enforcement policy alignment for From header

2. Origin Traceability & Geolocation Intelligence

Originating IP:	45.155.204.12	Estimated Location:	Frankfurt, Hesse, Germany
ISP / Autonomous System:	Cloud Hosting LLC (N/A)	Infrastructure Type:	Hosting/Cloud Node
Domain Age (WHOIS):	12 days old (2026-08-20)	Registrar:	NameCheap Inc

3. SMTP Relay Transmission Path (Hop-by-Hop Reconstruction)

Hop #	Transmission Node Role	Relay Host / IP	Timestamp (Extracted)
1	Earliest Originating Node	mail.attacker.com (45.155.204.12)	Fri, 4 Sep 2026 11:59:00 +00

4. Forensic Findings & Indicators of Compromise (IOCs)

- SPF check FAILED
- Domain resembles 'paypal' (lookalike)
- IP belongs to cloud hosting provider

LEGAL & FORENSIC PRESERVATION NOTICE: This document constitutes a preliminary technical forensic intelligence summary produced by PhishGuard for cyber incident response, institutional security auditing, and investigative coordination with Law Enforcement Agencies (LEAs / CERT-In). Cryptographic hashes recorded above verify evidence authenticity at time of ingestion in accordance with digital chain-of-custody standards.
